EDUCATION

Daulat Ram College, University of Delhi

Bachelor of Arts

Dept. Rank 1, CGPA: 8.19/10

2022 – 2025

Convent of Jesus & Mary

XII CBSE: Physics, Chemistry, Biology, Psychology, English

Percentage: 90.4

2021

Convent of Jesus & Mary

X CBSE

Percentage: 92.6

2019

EXPERIENCE

Product Designer

i3 Digital Health

Sep 2026 – Present

Remote

- Designing an all-in-one patient support app centered on community support, appointment coordination, and treatment navigation for cancer patients and their families, applying accessibility based principles.

Product Design Trainee

i3 Digital Health

Jun 2026 – Aug 2026

Remote

- Led end-to-end UX/UI design of the patient experience (web and mobile) for OncoTrials, an AI-powered clinical trial matching platform, designing 25+ screens from user research including competitive analysis of 5 platforms to annotated developer handoff. The work was pitched to investors and doctors.
- Designed onboarding flows for 4 distinct personas (patients, clinicians, hospitals, pharma companies) on OncoTrials, after conducting journey mapping across all four personas. The work was verified by oncology doctors at AIIMS.
- Designed KOL Intelligence, a platform for pharma companies to identify oncology Key Opinion Leaders, built a Figma-based design system and component library from scratch, and iterated on wireframes and high-fidelity screens through cross-functional collaboration with research scientists, and developers.

PROJECTS

AI Model Catalogue | Figma

- Conducted end-to-end user research for an AI model catalogue platform by analyzing competitor products such as Vercel, LiteLLM, Portkey, and OpenRouter, along with developer pain points surfaced through 7 GitHub issues, to define 2 challenge statements, user needs, and 5 new product opportunities.
- Used Claude to accelerate research synthesis and feature ideation, iterating on potential solutions to evaluate trade-offs and prioritize features that best addressed user needs and product gaps
- Designed in-platform model management workflows that allow users to add or update models directly through the UI instead of relying on external GitHub requests, reducing friction and improving workflow continuity.
- Enhanced model discovery and decision-making by introducing better filtering, comparison tools, lifecycle indicators, pricing transparency features, and clearer model information within the platform.

TECHNICAL SKILLS AND CERTIFICATIONS

Design: Prototyping (Low-fidelity and High-fidelity), Micro-interactions, Wireframing, User Flows, Responsive Design, Building and Maintaining Design Systems, Typography, Color Theory, Layout Design, Iconography, Doodling.

Research: User Interviews, Surveys, Persona Development, A/B Testing, Accessibility, Inclusive Design, User Journey Mapping, WCAG Guidelines, Information Architecture, Competitor Analysis, Empathy Mapping.

Tools: Figma, Canva, Adobe Creative Suite (Photoshop, Illustrator, XD), HTML, CSS, Framer, Sketch.

Certifications: Google - Foundations of User Research Design, Process of UX Design: Define and Ideate, Business Organisation, Developmental Economics.

Soft Skills: Communication and Collaboration, Problem Solving, Storytelling.
